What happened in the World Cup history?

The FIFA Women's World Cup has been held every four years since 1991. The United States has won four times and is the current champion after winning it at the 2019 tournament in France. The other winners are Germany, with two titles, and Japan and Norway with one title each. The FIFA U-20 Women's World Cup was first held in 2002 as the U-19 Women's World Championship. The current champion of the U-20 World Cup is Spain, who won their first title at the 2022 tournament in Costa Rica.

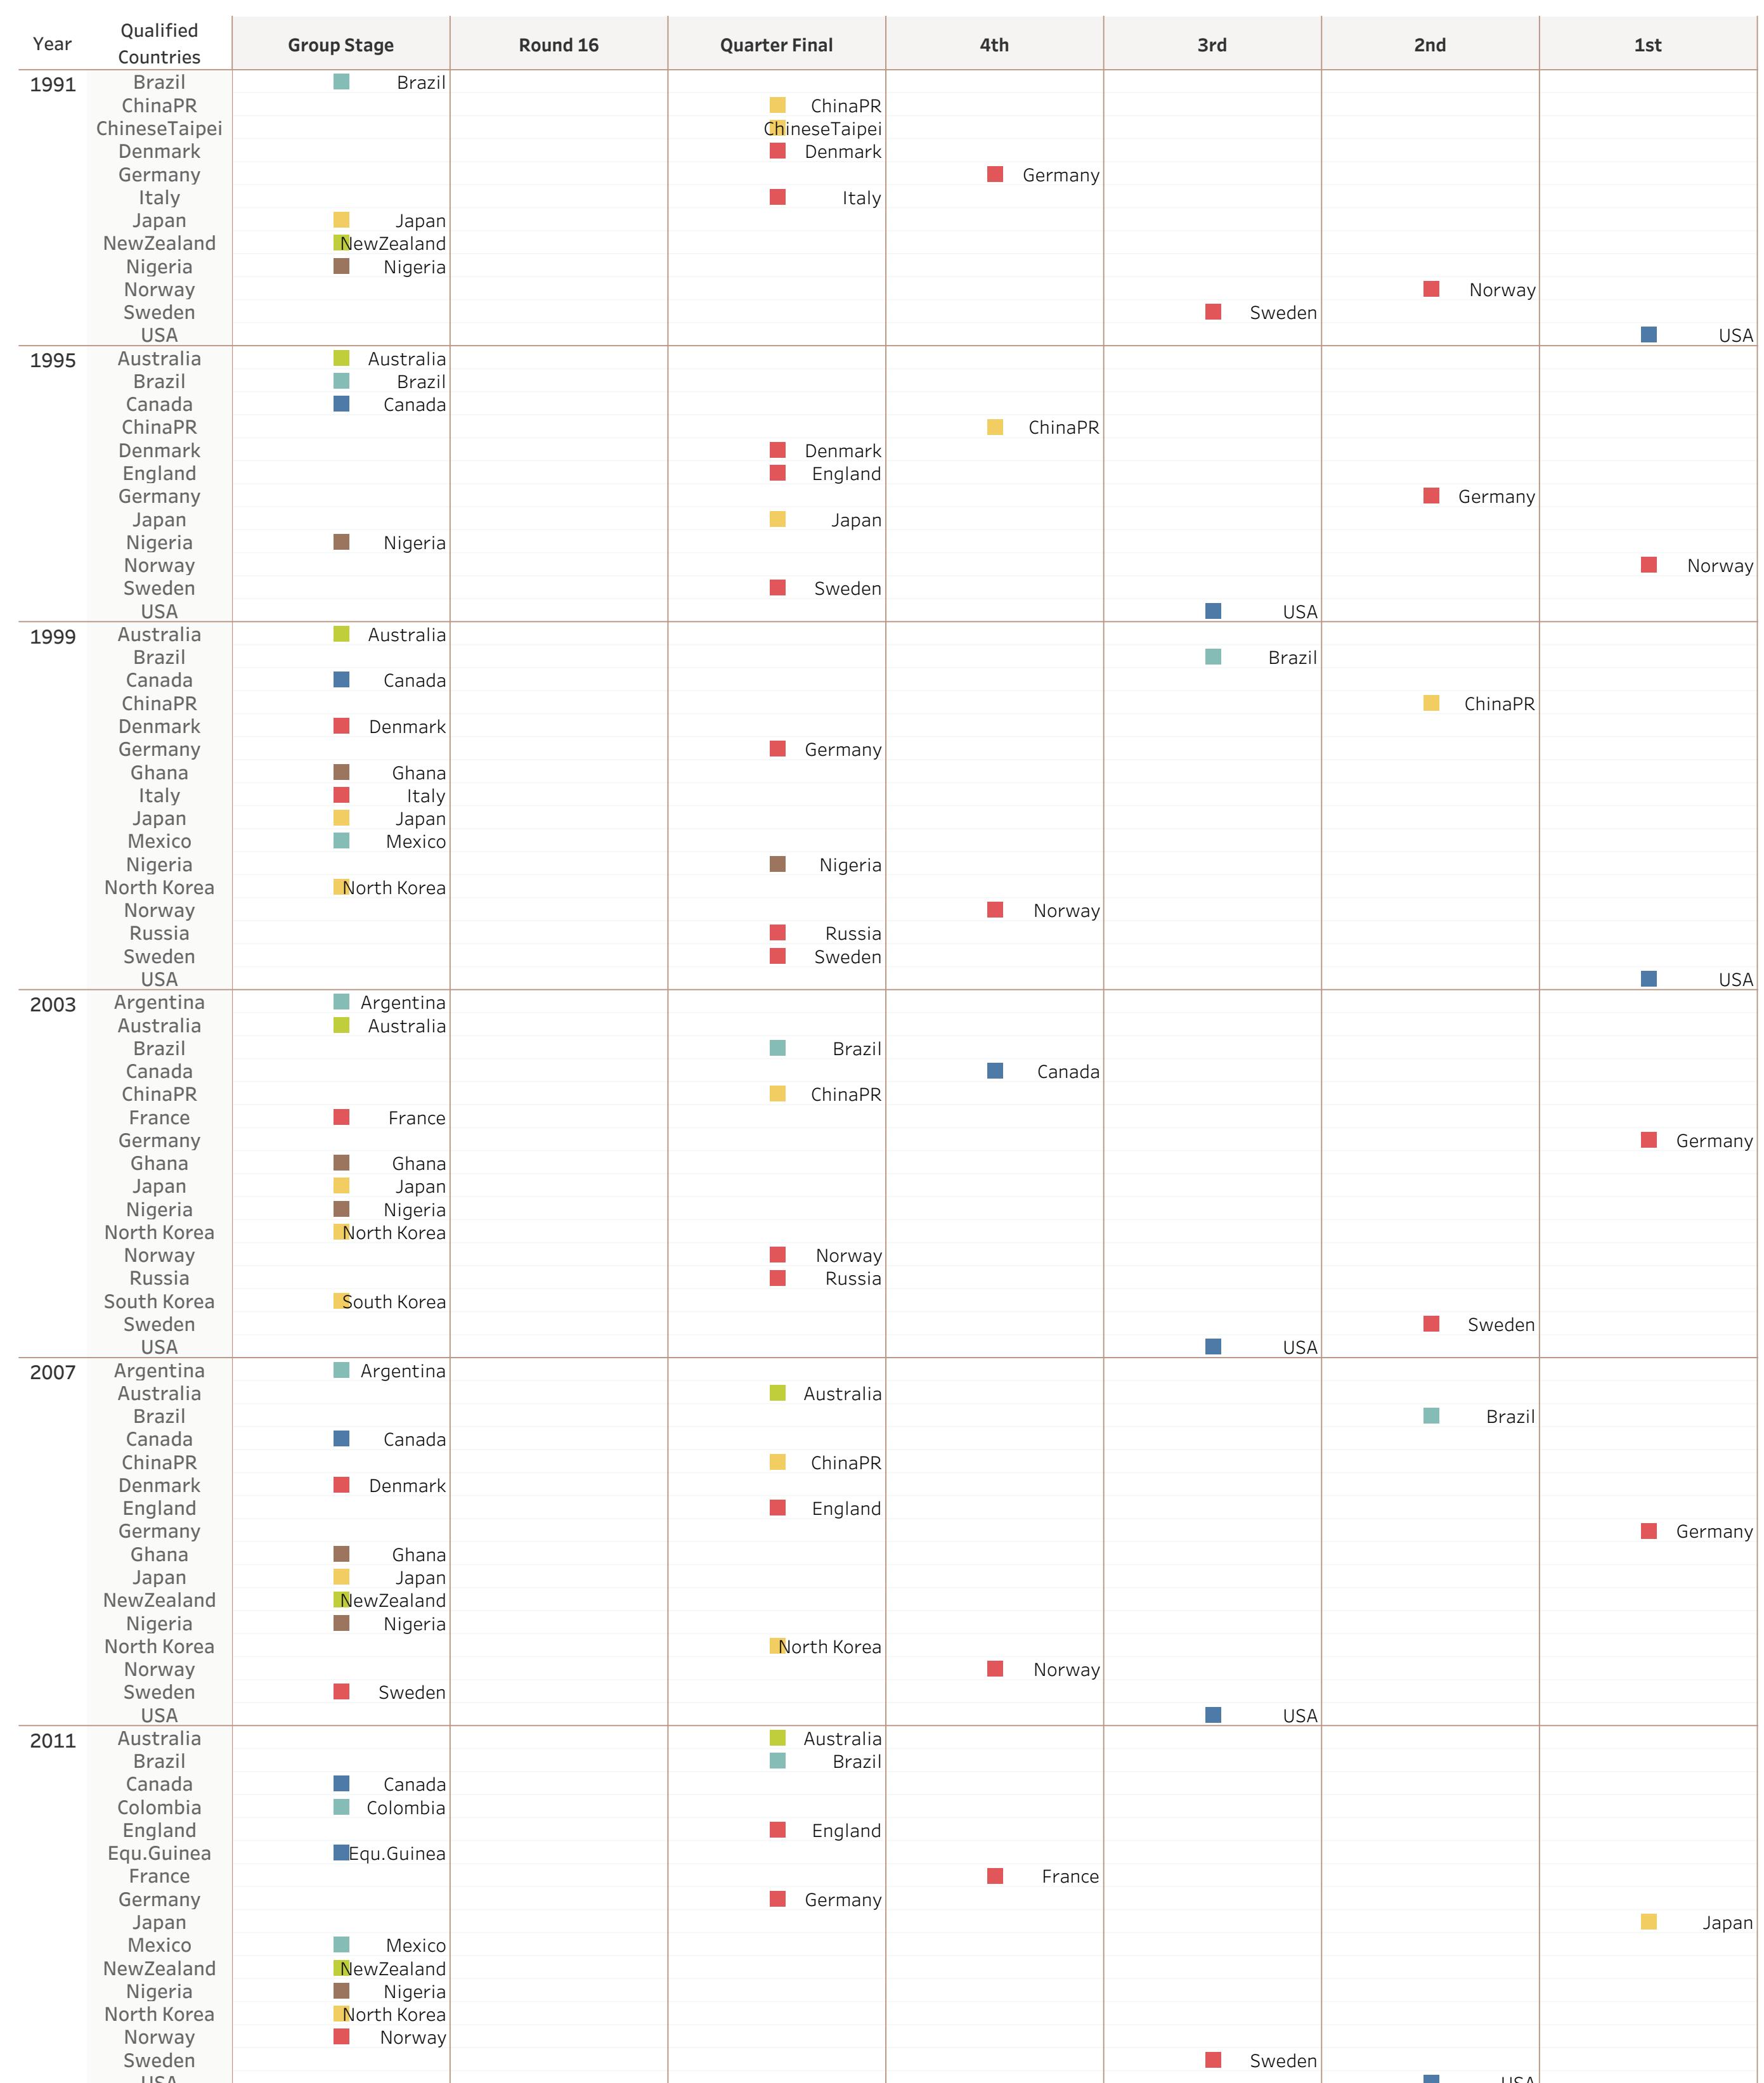

The following two charts count the appearance of each country that was qualified in World Cup and U-20 World Cup before 2023

Who did EA Sports include in FIFA game?

EA Sports has been using a wide network of real-life scouts who attend matches and watch tapes of games to determine the scores given to every player in the game. The ratings are updated upon each release of the series. The system rates players on general dimensions such as overall rating, passing, defending, etc. as well as detailed dimensions such as vision, volleys, composure, etc.

Following charts give us a quick view of how many players were included in the rating system and a rating comparision across countries. Although FIFA 24 game is released recently, only the previous versions' rating data is accessible to public, thus this research has only covered previous versions.

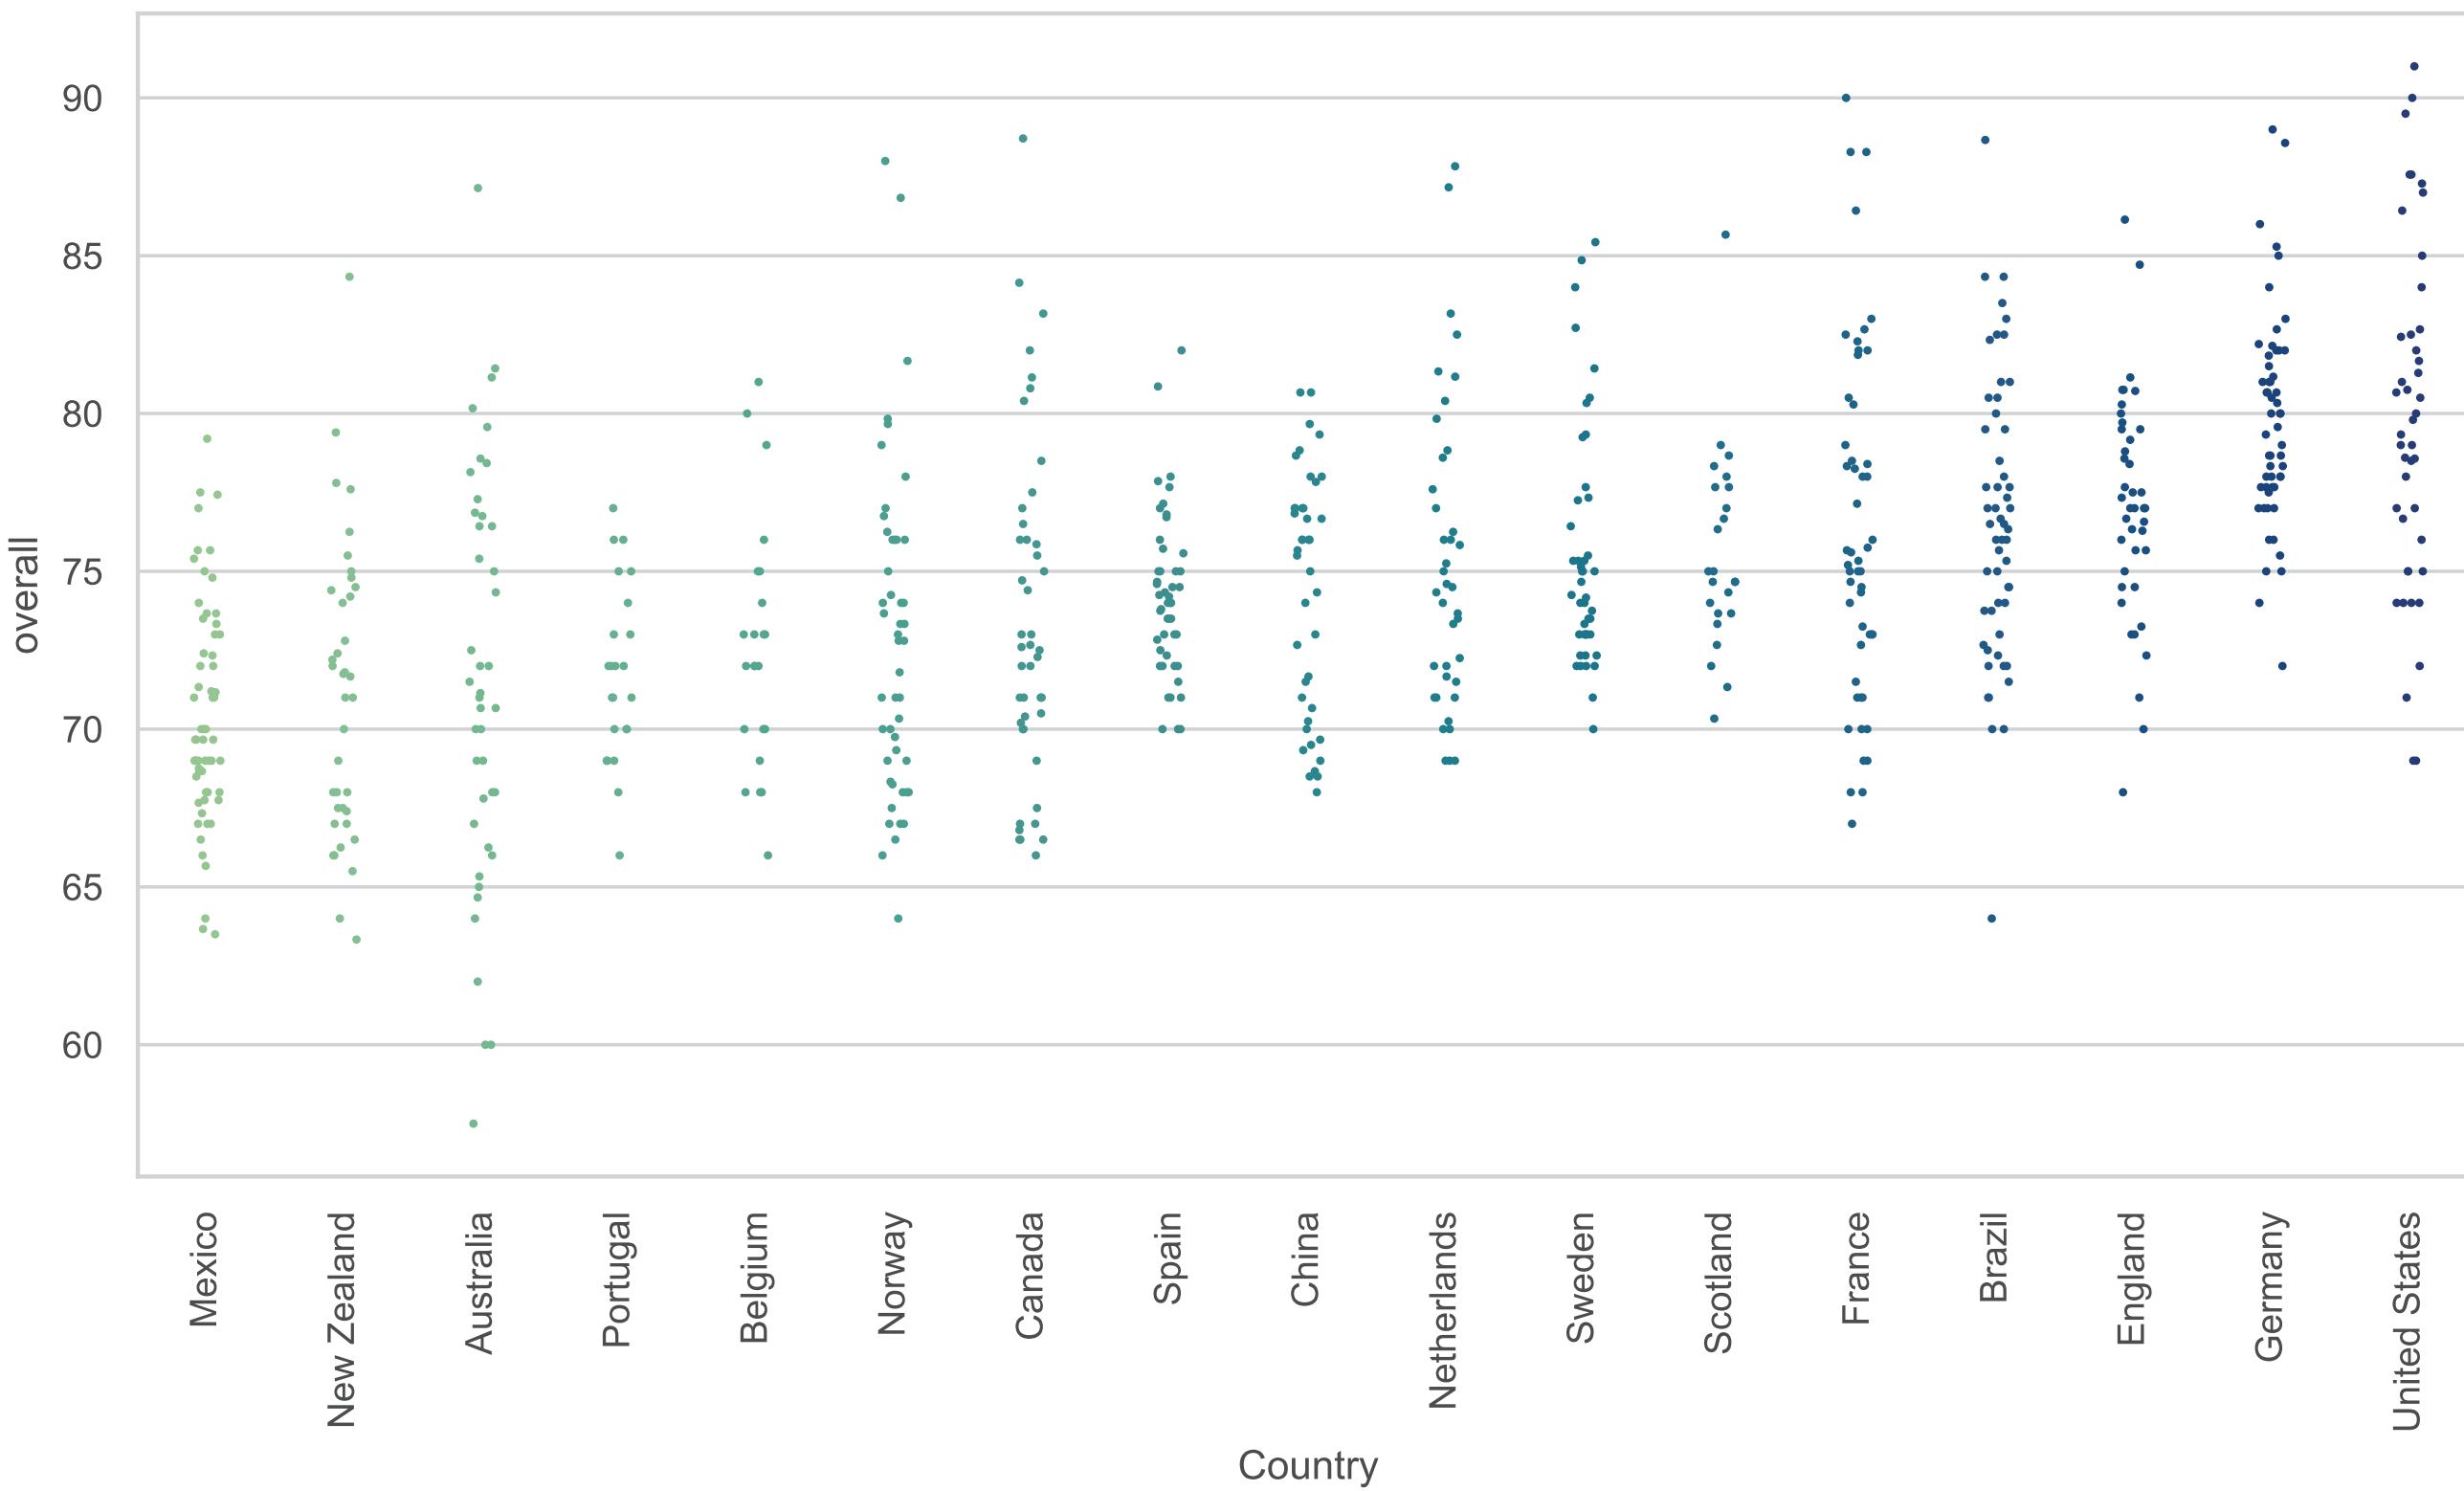

- FIFA 16-22

EA Sports has been including female players in the game since FIFA 16 by making women's national teams playable options.
